

### 3 High-Demand Professions Berxi Can Help Insure

### 3 High-Demand Professions Berxi Can Help Insure

---

Do you work with clients on a daily basis? Are you focused on providing results to said clients? If so, you shouldn't be without professional liability insurance. Whether you're self-employed, a freelancer, or employed by a firm, you can protect yourself and your career—a career you likely want to keep going for years to come.

Berxi can help. Berxi is part of Berkshire Hathaway Specialty Insurance Company (BHSIC), a company well-known for its comprehensive insurance options. Berxi has honed their focus and has built a reputation insuring high-demand professionals like you. They offer malpractice [insurance for nursing](#) alongside errors and omissions (E&O) coverage for real estate professionals and many others.

#### **Occupational Therapists**

In the healthcare field, occupational therapists, or OTs, often work directly with patients every day. OT can include rehabilitative services, physical training, and educating patients on ways to lead productive lives. Because of the therapies and treatments involved, it can be beneficial to have a malpractice policy just in case.

The good news is OT is a profession that can rarely see malpractice claims; however, having a policy can be useful. It can serve as peace of mind for a “just in case” scenario. And because Berxi is a direct-to-customer company, they can often keep policy costs affordable, which means as an OT, you also don't have to worry about the costs associated with your policy.

#### **Bookkeepers**

It's not uncommon for bookkeepers to work on contract or independently from the businesses they work with. Self-employed and sole proprietor bookkeepers can also take on risk when providing services to other businesses. This is where Berxi's errors and omissions (E&O) coverage can come in.

Whether you make an error on a balance sheet or you're accused of financial oversight, E&O coverage can help protect you and your own business in the meantime. Berxi's policy may help you cover costs associated with the claim. While the terms are different, E&O coverage can work similarly to that of Berxi's [nursing insurance](#)—it can help keep your career on track while potentially minimizing the financial burden that can come with claims.

## **Web Developers**

If something goes wrong with a client's website, web developers may end up taking the brunt of the blame. If something goes really wrong, a client may end up filing a claim or lawsuit against the web dev. If you're a web dev and this scenario happens, it can be a major disruption to your business, not to mention costly.

Berxi also offers E&O coverage to media and marketing professionals, including web devs. Like Berxi's professional [liability insurance for counselors](#) and other professionals, coverage may help you manage attorney's fees, settlement costs, and lost wages if you lose money due to time focused on your defense. Regardless of who's at fault when it comes to an error or omission in the development of a customer's website or other negligence related to your work, you can be protected.
