

4 Daniel Defense® Rifles Ready to Shoot Out of the Box

4 Daniel Defense® Rifles Ready to Shoot Out of the Box

Some marksmen love to tinker with their rifles. They add components, switch out parts, and modify their rifle to be as close to perfect as possible. But what if the rifle didn't need upgrades and was already excellent at its job straight from the box? From the [MK12 rifle](#) to the Delta 5 bolt-action rifle, Daniel Defense® offers prebuilt rifles that perform flawlessly right out of the box. Here are a few options to check out.

MK12 Rifle

The evolution of the special-purpose rifle, the MK12 is constructed around an 18-inch cold hammer forged barrel to achieve the most precise alignment of the chamber to the bore. The MK12 offers unprecedented accuracy and durability, with a 12-inch free-floating Picatinny quad rail offering the precision you need straight out of the box. If you want a longer, precision-oriented AR-style rifle, go for the MK12.

M4A1

The M4A1 is one of the most famous AR15-style rifles, and the Daniel Defense® version updates it for the modern marksman. A fully ambidextrous lower allows for switching off between left- and right-handed shooters. Operating the safety, mag release, and bolt catch is easy without removing your dominant hand. Even the charging handle is ambidextrous. The [AR15 upper receiver](#) group is rounded out with a 14.5-inch cold hammer forged M4 profile barrel with a flash suppressor.

DD5V4 Hunter

If you're looking for a [308 AR](#) or other hunting-worthy caliber, choose the DD5V4 Hunter. This fast-handling rifle is perfect for hunting any North American big-game animal. It provides users with a semi-automatic platform with even greater long-range shooting capability. It's a highly accurate, highly durable rifle with an adjustable gas block, allowing for a consistent feel whether shooting suppressed or unsuppressed. With a bolt carrier group tuned to reduce overall recoil impulse, it's a rifle you can take out of the box and out into the field.

Delta 5 Pro

The Delta 5 Pro is a long-range precision machine. It's a bolt-action rifle collection featuring custom enhancements, innovative features, and world-class hammer forged barrels. The barrels are easy to switch out to replace or change calibers. A muzzle brake offers the ultimate reduction in muzzle rise and recoil. It even comes with a sub-.5 MOA guarantee. More experienced shooters will appreciate the rich feature set right out of the box, leaving plenty of room for future upgrades. There's even a limited-edition accuracy package with a scope, bipod, and upgraded muzzle brake available on a built-to-order basis, zeroed and guaranteed to shoot .75 MOA or better.
