

4 Retro Inspired Gift Ideas from Armitron®

4 Retro Inspired Gift Ideas from Armitron®

There's something special about a retro style watch. Armitron® knows retro. Armitron® has been designing watches since 1975, and were on the cutting edge of the digital revolution during the 1980s. Part of that revolution included digital watches that everyone had to have. Today, those watches are making a comeback in a big way, and Armitron® has the retro style watches that capture the spirit of these decades gone by, like the Rogue™, a [sport watch](#) designed to look like a blast from the past. This holiday season, you can give the gift of retro style with any of the watches in the Armitron® Retro Collection. You may even find a little something for yourself.

The Quintessential Digital Retro Watch

If you know anyone who's a fan of retro design and digital watches, Armitron® has exactly what you're looking for. One of these watches is the Griffy™. The Griffy™ is available in several styles, including silver/red, silver/green, gold/red, and black/red. It features a bold digital readout straight out of the late 70s and early 80s. It's encased in a minimalist stainless steel case straight out of the same era. The retro timepiece comes together with a stainless steel bracelet. When you want to go retro, the Griffy™ answers the call.

A Retro Style Watch with Sports Heritage

When digital watches hit the scene in the 70s, it didn't take long before they became a sports staple. In the 80s and 90s, sport watches were everywhere. Armitron® has a full collection of [sport watches for men](#) and women, so you can find the perfect one for your fitness routine. The Rogue™ watch has all the functionality and features of a sports watch with retro style case and band in either black or blue. This is the kind of sports watch you can wear for practically any occasion. Because it's so easy to style and so easy to wear, it makes for a great gift.

The Best of Both Retro Worlds

The Ridgemont™ is a retro-inspired watch that brings together an analog and digital face in a squared case right out of the 80s. The gold-toned case, band, and dial make it even better. It's another Armitron® classic that can be dressed up or down. Its versatility makes it a style that any watch enthusiast is sure to love. The Ridgemont™ is just as smart as it is timeless.

Another excellent example of a retro watch that offers both a digital and analog display is the Flashback™. It's available in three different colorways, including iridescent/black, complete with a black mesh bracelet, a transparent dial, and an iridescent plated case. All these stand-out features come together for a watch that boasts distinctive retro style combined with modern flair.

Whether you're looking for a digital watch, a [gold watch for women](#), or a sport watch to keep you going, Armitron® has the perfect selection to find a watch that meets your needs.
