

4 Ursa Major Products to Use During Your Nighttime Skincare Routine

4 Ursa Major Products to Use During Your Nighttime Skincare Routine

Your nighttime skincare routine is, by necessity, different than your morning routine. You might use a vitamin C [brighten serum](#) in the morning and a serum with retinal in the evening, an ingredient best used toward the end of the day. Ursa Major offers a number of products that are perfect for your nighttime routine.

Essential Face Wipes

Cleansing is an essential part of a nighttime routine. You need to wipe built-up dirt, grime, sweat, and makeup off, or you could clog your pores. Ursa Major's Essential Face Wipes are the perfect [wipes for face](#) cleansing, as they both cleanse and hydrate thanks to a generous dose of the 4-in-1 Essential Face Tonic formula. You can bring the wipes with you anywhere you go, but it's also an excellent one-step cleanse at the end of the day. It cleans, exfoliates, hydrates, and soothes your face, giving you a refreshing end to the day.

Lunar Bloom Retinal Serum

Are you looking for a light-as-air nighttime serum? Ursa Major's Lunar Bloom Retinal Serum can help smooth the appearance of fine lines. It uses retinal, or retinaldehyde, a form of vitamin A. It's similar to retinol but is 20 *times* more potent, but less likely to irritate your skin. You won't want to use it every night, so be sure to alternate it with another serum, such as Ursa Major's Mountain Glow Golden Serum, and be sure to use sunscreen in the morning.

A.M. Tip: To round out your skincare serums, a [vitamin C serum brightening](#) formula may be exactly what you are looking for in your morning routine. Plus, it offers the ideal amount of hydration.

Golden Hour Recovery Cream

Another hydration option Ursa Major offers is the Golden Hour Recovery Cream. It's not only great as a daily moisturizer but can also help reduce the appearance of wrinkles as a luxurious night cream. This just-right, rich face cream (not too heavy, not too light) sinks right into the skin, immediately providing nourishment and hydration. It's also gentle, helping to calm the look of redness while evening the appearance of skin tone. It works well with all skin types, keeping your skin hydrated so it looks and feels its best.

Forest Alchemy Eye Cream

Your eye area is particularly sensitive, requiring special attention and extra hydration. The Ursa Major Forest Alchemy Eye Cream is a supremely nourishing product with powerful active ingredients. It's luxurious with its rich, creamy texture, reducing the appearance of fine lines and wrinkles around the eyes while addressing the look of dark circles and puffiness. The cream supports your skin's overall elasticity by boosting natural collagen production. The result? Smoother-looking skin around the eyes.
