

6 Items Your 4Patriots Solar Powered Generator Can Power in

6 Items Your 4Patriots Solar Powered Generator Can Power in Emergencies

When the power goes out, you need to act fast. Medicine and food can spoil quickly. Without power, you'll lose access to news and weather updates. Plus, you still need a light source after the sun goes down. With a 4Patriots [solar powered generator](#), you won't have to worry about coming up with solutions on the fly. A reliable generator can power a wide variety of devices. Here are 6 examples:

Refrigerator

A top priority during a blackout or loss of power is your food supply. Your refrigerator can only keep your food safe for so long before it starts to warm up. Keep your fridge powered with a 4Patriots [generator with solar panel](#) charging. This means keeping your food cold and safe. You can also make sure medicine, such as insulin, stays chilled. It can run a mini fridge for about 106 hours or a full fridge for a little over 19 hours on a full charge. With the power of the sun, you can keep it running as long as you need.

Freezer

Your silent, fume-free generator can also power a freezer. It's perfect if you have a dedicated freezer in your garage. The generator can keep a freezer running for about the same amount of time as your fridge. It's a great way to ensure you don't lose your frozen food during a power outage or other emergency.

Lights

An easy way to maximize your family's safety during a blackout is with a reliable light source. But an unexpected outage can mean no power for an extended period of time. That means no lights. Light up your life with a 4Patriots generator. You can keep working in the dark while warding off wildlife that might be looking for food after sundown. Keep a floodlight on outside or power a USB lamp in your home. Choose a generator that's portable and easy to move wherever you need light.

Smartphones

USB plugs mean a 4Patriots [portable solar generator](#) can also charge your smartphone. This also applies to other portable electronics. You can stay in touch with family and friends. Or you can get updates on the news and weather. It's the best way to maintain your connection to the outside world. It's also a great solution for staying connected to the internet. If you have questions during an emergency, you can still find answers with a smartphone.

Medical Devices

Medical devices like CPAP machines and oxygen units need power. Keeping them running may be vital for your survival. Hook them up to a 4Patriots generator, and you won't have to worry about keeping your medical devices going. You'll have everything you need to outlast the blackout.

TVs

TVs are important during emergencies. If you lose cell phone reception, you can still stay updated with the latest news with a TV. It's essential for staying informed. During an emergency, knowledge is power. You can learn vital information, like where to go for emergency services. Or you'll hear when power is expected to be restored and what the weather forecast looks like for the next few days.
