

## Additive Elements: Your Perfect Partner For 3D Printing Service

---

Are you searching for cost-effective 3D printing online ([3D druck online](#)) solutions? If so, you should work with a trusted name in the industry like Additive Elements. This company offers a powder-based online 3D printing service. You can get these solutions for up to 850 mm in length.

Moreover, this company has been focusing on sustainability. It recycles around 100%. This innovation has been made completely in Germany. This company is one of the most renowned service providers in this field. So, when it comes to additive manufacturing, all you need to do is contact Additive Elements. This company prioritizes efficiency and quality over everything else.

If you choose Additive Elements, you will always be stunned by the results. Let's discuss more.

### **Self-developed 3D printing process**

Additive Elements has developed a 3D printing process TLC (Thermal Liquid Curing). This process helps ensure they only produce the most premium quality components. The mechanical properties are also excellent and there is low war page too. The best part is the price range. The 3D printing service ([3D druck service](#)) is available at reasonable prices. This unique process helps produce dense plastic parts with the help of binder jetting technology. This is happening for the first time.

### **Protecting the environment**

Additive Elements is highly careful towards the environment and wishes to protect it. The unique process helps achieve an almost 100% powder recycling rate. The company ensures to keep the environment safe while completing the production of functional components. This unique process has been patented. It helps reduce resource and energy consumption.

## Getting the finished component

The first thing you need to do is check out the contact form on the website of Additive Elements. You can also share your CAD data through email. After this, the company will connect and guide you in choosing the perfect material. It will also work on optimizing the data for 3D printing. The last step would be manufacturing and shipping. The team of Additive Elements will manufacture the components and ship them if you need them.

## Several customers and partners

Additive Elements has worked with a wide range of customers and partners. Some of them are the most trusted companies. You can easily rely on the experience of additive developments and work with them for your needs. If you wish to get 3D printed ([3D drucken lassen](#)) solutions, check out the website of Additive Elements today. This company will offer excellent results.
