Build a Summer Skincare Routine Around Sunscreen From Epicuren Discovery®

Build a Summer Skincare Routine Around Sunscreen From Epicuren Discovery®

With summer just around the corner, prioritizing sun protection in our skincare routines is extremely important. And what better time to remember than on National Sunscreen Day: May 27! You can help safeguard your skin with the perfect sunscreen set from Epicuren Discovery® and build a comprehensive summer regimen that ensures high-quality, clean skincare all summer.

Get a Gentle But Thorough Cleanse Daily

Cleansing is the essential first step in your routine before applying any other skincare products. Choose the best one from Epicuren for your skin type. And if you wear makeup, especially eye makeup, you need a practical way to remove your cosmetics safely first.

The Crystal Clear Eye <u>Makeup Remover</u> from Epicuren is a fragrance-free, velvety gel that makes removal a breeze. This product, packed with peptides and vitamins, is formulated to strengthen the appearance of delicate skin around the eye area. It can effortlessly remove stubborn mascara and long-wear eyeliner.

Shield Your Skin with Mineral Sunscreen Every Day

Now, onto the star of your summer skincare routine: sunscreen. Epicuren's Zinc Oxide Perfecting Sunscreen SPF 27 is one of your skin's best defenses against potentially harmful UVA

and UVB rays. Formulated with non-nano zinc oxide, this broad-spectrum sunscreen provides

reliable protection while remaining gentle on the skin.

This zinc oxide sunscreen from Epicuren is a reef-safe lightweight, non-greasy formula, leaving

behind a sheer finish—perfect for daily wear under makeup or alone for a natural look. Reapply

as needed every day and 20 minutes before stepping into the sun.

Purify the Skin Weekly with a Green Tea Mask

After you cover the basics of your skincare routine, which may include cleanser, serum, and

moisturizer, you may want to treat yourself weekly to a gentle green tea mask that delivers

multiple nutrients onto the skin.

Epicuren's Green Tea and Seaweed Soothing Mask is a refreshing marine mask for all skin types.

You can use this product up to twice a week to help improve your complexion's overall

appearance. It delivers essential nutrients and helps purify the skin for the appearance of a soft,

radiant glow. On freshly cleansed skin, you'll apply a layer of mask and allow it to dry for about

20 minutes before gently wiping it off with warm water and a damp towel.

This summer, give your skin the care and sun protection it needs with thoughtful products from

Epicuren. While sunscreen may be at the heart of your complete skincare routine, there are

plenty of ways to build a successful regimen around your particular skin concerns and needs,

plus products that just make you feel good using them.
