

# Enhancing Industrial Flooring with ITW Performance Polymers Solutions

---

The floor of any industrial place has a tough job on its hands. It has to face heavy machinery, foot traffic, industrial chemical spills and what not. You have to ensure its longevity and safety by performing regular repair work and maintenance. Here, you can take help from a global supplier known as ITW Performance Polymers. They have excellent multipurpose products for a wide range of applications. Let's explore some of their flooring and [repair concrete expansion joints](#) products here.

## Investment protection ensured with Devcon® Floor Patch™

Cracks and surface damages are common with industrial flooring. Devcon® Floor Patch™ is a product designed by ITW Performance Polymers for this. The product has a compression strength of 8000 psi – which is three times that of typical concrete. It is a formidable solution for patching concrete surfaces. You can use Devcon® Floor Patch™ and make sure your concrete floor is ready to withstand heavy use again.

## Sealing with Devcon® Epoxy Concrete Sealer

For repairing purposes like [concrete expansion joint repair](#), and sealing, Devcon® Epoxy Concrete Sealer is an excellent product. This sealer of great protection with 100% solids epoxy to create high end protection with durable and chemical resistant coating. You can even use it as a primer setup for damp surfaces.

## Cleaning and maintenance with Devcon® Cleaner Blend 300

A good industrial floor is also a well-maintained floor. The key product from ITW Performance Polymers, is the Devcon® Cleaner Blend 300 designed for cleaning. This product works for multiple purposes. It works well as a degreaser and also as a product to remove oil deposits on metal. No rinsing is required with this product because it evaporates fast. The Devcon® Cleaner Blend 300 is preferred by many clients because it is quick and effective, and cleans up the mess as required.
