Products From UNITE Hair**

## Headlining Hair: Get Your Festival Faves On Lock with Products From UNITE Hair

---

With music festival season in full swing, you can keep your hairstyles looking fresh with professional products from UNITE Hair. From the main stage to the after-parties, the following tips and tricks from professional stylists can also help you achieve iconic desert hair status. Here's what you need and a few styles that are ready to party.

### Mermaid Waves

After creating this free-spirited look, you can polish your waves with SMOOTH&SHINE™ Styling Cream followed by the waterless U:DRY™ Fresh Dry Conditioner, which is formulated to tame frizz and soften and shine hair. This lightweight dry conditioner also provides much-needed UV protection. If you have blonde locks, don't forget to cleanse with toning [violet shampoo](#) to help prevent brassiness before you're desert-bound.

### Long and Sleek

Whether you're going for a country diva look or giving rave-girl vibes, create your perfect long and sleek style. On towel-dried hair, apply U Oil™, an argan oil that gives beautiful shine and protects strands from humidity-causing frizz. Then, blow-dry the hair smooth. Before using a flat iron, spray 7SECONDS™ Glossing Spray for extra shine. Part the hair down the middle and finish the look with SESSION-MAX™ Spray to lock in the style.

### Half-Up Ponytail

With a cute half-up style, you'll have a sky-high wrapped ponytail with loose, voluminous curls on the bottom. Start with big, bouncy waves, then use TEXTURIZA™ Spray, a popular [texturizing spray hair](#) stylists love to use on their own clients for added weightless volume and texture. For a long-lasting hairstyle, finish with extra-hold finishing MAXCONTROL™ Spray.

## Conjoined Braids

Get ready to whip your hair back and forth with a unique conjoined braid. Before braiding, use U Oil™ to add shine and smooth strands. This is also a great trick to moisturize hair while styling. To conjoin braids, you can wrap the ends of each braid to one another, spray them with hairspray, and then secure the braids in place with bobby pins. You can also use a ribbon the same color as your hair to wrap the braids together.

## Braided Pigtails

The beauty of braided pigtails is they protect your hair from the elements. The key to keeping hair nourished is spraying 7SECONDS™ Detangler throughout before snatching it into two pigtails. Instead of using heat, allow the detangler to penetrate the hair cuticle to give your mane the needed moisture. You'll create little braids in each pigtail. You can finish your style with 7SECONDS™ Glossing Spray.

Whether you're bound for the desert or simply need to replenish your home stash, UNITE Hair can help you with everything from styling and finishing products to shampoos and conditioners for all hair types, including non-toning daily [purple conditioner](#) for keeping blonde hair bright and moisturized.
