

How Mineral Fusion® Nail Care Products Will Change Your Summer

How Mineral Fusion® Nail Care Products Will Change Your Summer

Mineral Fusion® is a clean beauty brand with an extensive collection of high-quality products that work to enhance the natural beauty of your features. In addition to nourishing mineral makeup like their So Classy [Volumizing Mascara](#), Mineral Fusion also offers a large selection of vegan nail care products, including acetone-free fingernail polish remover and a high-performance Gel Top Coat. Mineral Fusion works hard to ensure every part of your beauty routine features ingredients that will support the natural state of your skin and nails. This summer season, your favorite Mineral Fusion products will change how you enjoy beauty and nail care.

Elevate Your Manicures

Everyone who loves to paint their nails knows that regular manicures are the secret to well-kept nails, but some manicures are better than others. You can elevate your manicure with high-quality products from start to finish. Mineral Fusion's nail lacquers have a 16-free formula that will elevate your manicure, exchanging potentially harsh ingredients for clean ones that don't compromise the quality of your manicure. From the moment you remove your previous manicure's lacquer using Mineral Fusion's acetone-free fingernail polish remover to the moment you apply the finishing touch with one of the brand's high-performance top coats, you will notice the difference in the quality of your manicure.

Strengthen Your Nails

Mineral Fusion's 16-free nail lacquer formula features ingredients to help strengthen your nails. The bio-ceramics in their nail polish colors help reduce the chances of your nails weakening

over time. Additionally, Mineral Fusion offers a non-acetone fingernail polish remover to avoid the potentially harsh ingredients that may appear in conventional nail care products. Without alcohol or other potentially harsh ingredients, Mineral Fusion's vegan nail polish remover helps nourish your nails. You can follow it with a cuticle oil and base coat to start your summer manicure using the best practices and end your manicure with a [Gel Top Coat](#) to keep chips and scratches at bay for a long-lasting manicure.

Perform Beautifully

After following these steps, the result is a stunning, chip-resistant manicure without potentially harsh ingredients that should last about two weeks. The nail lacquer glides on smoothly, staying bright and beautiful beneath the Gel Top Coat so that your manicure will enhance every summer outfit. When it's time to remove your nail polish, use a cotton ball to apply the acetone-free [fingernail polish remover](#), wait a few seconds, and then wipe away the color for a fresh start to a new manicure.

Mineral Fusion is constantly working to improve their formulas to provide the best options on the market, including seasonal colors as your taste in nail color changes from one season to the next. Whether it's a simple French manicure or a shimmering shade for summer, with Mineral Fusion you don't have to choose between a stunning manicure or clean ingredients. Get the best of both with Mineral Fusion.
