

Hydraulic Reversible MB Plough for Tillage

Hydraulic Reversible MB Plough is an essential agricultural implement designed for heavy-duty ploughing tasks suitable for various soil types. The Hydraulic Reversible MB Plough is an advanced agricultural implement used for primary and secondary tillage operations. The [Hydraulic plough price](#) is INR 75,000 to 2.30 lakhs in India and varies according to the model, and dealer location.

It is equipped with hydraulic systems that allow for easy reversal and maneuverability, enabling efficient and quick ploughing operations. The reversible feature enables the plough to swiftly change direction, facilitating smooth and consistent furrow creation and soil turning.

Uses:

The Hydraulic Reversible MB Plough is utilized for primary and secondary tillage operations.

It is used for turning the soil, burying crop residues, and improving soil structure.

This plough helps in preparing the field for sowing and planting activities.

Benefits:

Enhanced Efficiency: The hydraulic system facilitates quick and effortless reversals, enhancing overall operational efficiency.

Versatility: It is suitable for various [tractors](#) and uses in a variety of soil types and field conditions.

Reduced Effort: The implement minimizes the physical effort required for ploughing tasks, leading to reduced labor and time consumption.

Soil Aeration and Weed Control: It effectively aerates the soil, promotes better water absorption, and aids in weed control.
