• ABOUT Regional Research Reports (RRR)

Regional Research Reports solves all the data problems by providing industry analytics data that is easy to understand and reliable. We are a leading provider of custom and exclusive market research reports; we provide state-of-the-art business analysis to clients across multiple sectors.

Our research team is highly qualified to benefit well-established companies and startups with their market research needs. In a world where endless disruption is the norm, not the exception, Regional Research Reports provides the foundation for a strategy to identify opportunities and challenges early and win customers. Since our founding, we have been working closely with large multinationals and small and medium-sized enterprises (SMEs). Today, we are proud to have 80% of our Fortune 2000 customers as our customers.

We provide qualitative and quantitative research spanning market forecasting, market segmentation, competitive analysis, and consumer sentiment analysis. We also provide customized consulting solutions from beginners to successful market entry. To do this, take an interdisciplinary approach to market intelligence, combining new and proven, tested ones. Our consultants use unique research techniques and advanced market research tools to transform complex data into easy-to-understand results.

We have base location in the United States and have offices in Ireland and India. In addition to our in-house analyst team, we also have a field analyst team that connects with stakeholders in the value chain to obtain critical information. Join us and discover how our market research skills can strengthen your company's value.

RESEARCH PROCESS

Our research is an optimum culmination of secondary and primary research, with the latter playing a major role. We also have an in-house repository and access to a number of external regional and global paid databases to help address specific requirements of our clients. The research process begins with a holistic secondary research, followed by expert interviews. The information gathered is then comprehensively analyzed by our highly experienced in-house research panel

Nuclear Medicine Radioisotope Market, Industry Development, Future Trends, Growth Analysis and Forecast by 2033

According to the Regional Research Reports, the **global nuclear medicine radioisotope market** size is projected to be **USD 8 billion in 2022** to **USD 19.04 billion in 2033**, exhibiting a **CAGR of 8.82%** from 2023 to 2033.

The research provides in-depth details on the market's present analysis and future growth expansion. The report offers a thorough analysis of the global nuclear medicine radioisotope market by carefully evaluating a variety of market-relevant factors, including key drivers, growth inhibitors, opportunities for the future, regional market conditions, recent advancements, the regulatory environment, and a detailed analysis of the top players and organizations dominating the industry.

The research also includes profiles of the 25 major market participants active in the global nuclear medicine radioisotope market. The research offers several insights and details on the firms, their leaders, their financials, their business strategies, as well as the innovative steps they have taken to gain a monopoly on the global nuclear medicine radioisotope market.

Key Market Segments:

The report segments the global market into type and applications.

By Type (Sales, Growth Rate, USD Million, 2018-2033)

- Technetium-99m (Tc-99m)
- Thallium-201 (Tl-201)
- Gallium-67 (Ga-67)
- Iodine (I-123)

By Applications (Sales, Growth Rate, USD Million, 2018-2033)

- Cardiology
- Oncology
- Neurology
- Lymphoma
- Thyroid

Regional Outlook (Sales, Growth Rate, USD Million, 2018-2033)

- North America (the United States, Canada, and Mexico)
- South America (Brazil, Argentina, and Rest of South America)
- Europe (Germany, UK, Italy, France, Spain, and Rest of Europe)
- Asia-Pacific (China, Japan, South Korea, India, Australia & New Zealand, and Rest of Asia Pacific)
- The Middle East and Africa (GCC Countries, Egypt, Saudi Arabia, South Africa, and Rest of MEA)

Nuclear Medicine Radioisotope Market By Regional Outlook (Sales, Growth Rate, USD Million, 2018-2033)

- North America (US, Canada, Mexico)

Europe (Germany, France, the UK, Italy, Spain, Russia, Poland, The Netherlands, Ukraine, Norway, Czech Republic, Rest of Europe)

- Asia Pacific (China, Japan, India, South Korea, Indonesia, Malaysia, Thailand, Singapore, Australia and New Zealand, Rest of Asia Pacific)

- South America (Brazil, Argentina, Colombia, Rest of South America)

- The Middle East and Africa (Saudi Arabia, the UAE, South Africa, Northern Africa, Rest of MEA)

Direct Purchase

Major Key Players in the Nuclear Medicine Radioisotope Market:

The report offers details about these companies, including the product overview, financial and yearly performance, strategic plans & developments, product line, and SWOT analysis. In terms of revenue, the global two largest companies occupied for a share nearly % in 2022. The main players in the global market include –

- TI
- ST
- Renesas Electronics
- Panasonic
- Analog Devices
- Maxim
- NXP
- Infineon Technologies
- SG Micro

(Note: The list of the key market players can be updated with the latest market scenario and trends)

Major Key Players:

The report offers details about these companies, including the product overview, financial and yearly performance, strategic plans & developments, product line, and SWOT analysis.

- Bayer AG
- Bracco Imaging SpA
- Cardinal Health, Inc.
- GE Healthcare
- Hologic, Inc.
- Lantheus Medical Imaging, Inc.
- Medtronic PLC
- NTP Radioisotopes SOC Ltd.
- Positron Corporation
- Siemens Healthineers

Common Radioisotopes in Nuclear Medicine

1. Technetium-99m (Tc-99m)

- 1. Uses:** Widely used in diagnostic imaging, including bone scans, cardiac stress tests, and imaging of various organs.
- 2. Half-life:** 6 hours
- 3. Advantages:** Emits gamma rays suitable for imaging and has a short half-life, reducing radiation exposure.

2. Iodine-131 (I-131)

- 1. Uses:** Used in the treatment of thyroid cancer and hyperthyroidism; also used in diagnostic scans for thyroid function.
- 2. Half-life:** 8 days
- 3. Advantages:** Effective in targeting thyroid tissue due to its uptake by the thyroid gland.

3. Fluorine-18 (F-18)

- 1. Uses:** Used in positron emission tomography (PET) scans, particularly for cancer detection, brain imaging, and cardiac studies.
- 2. Half-life:** 110 minutes
- 3. Advantages:** High-resolution images due to positron emission, enabling precise localization of abnormalities.

Thank You
