WAREHOUSING AND THIRD-PARTY LOGISTICS

Our 3PL Logistics Service is here to help you choose the best locations for your facilities as you go through the development process. We also assist clients in determining the best rack layout and stock levels. Integrating our WMS solution with your ERP system allows for streamlined order processing and inventory management. In this approach, you may receive orders directly from the OM system and update the MM module with any changes.

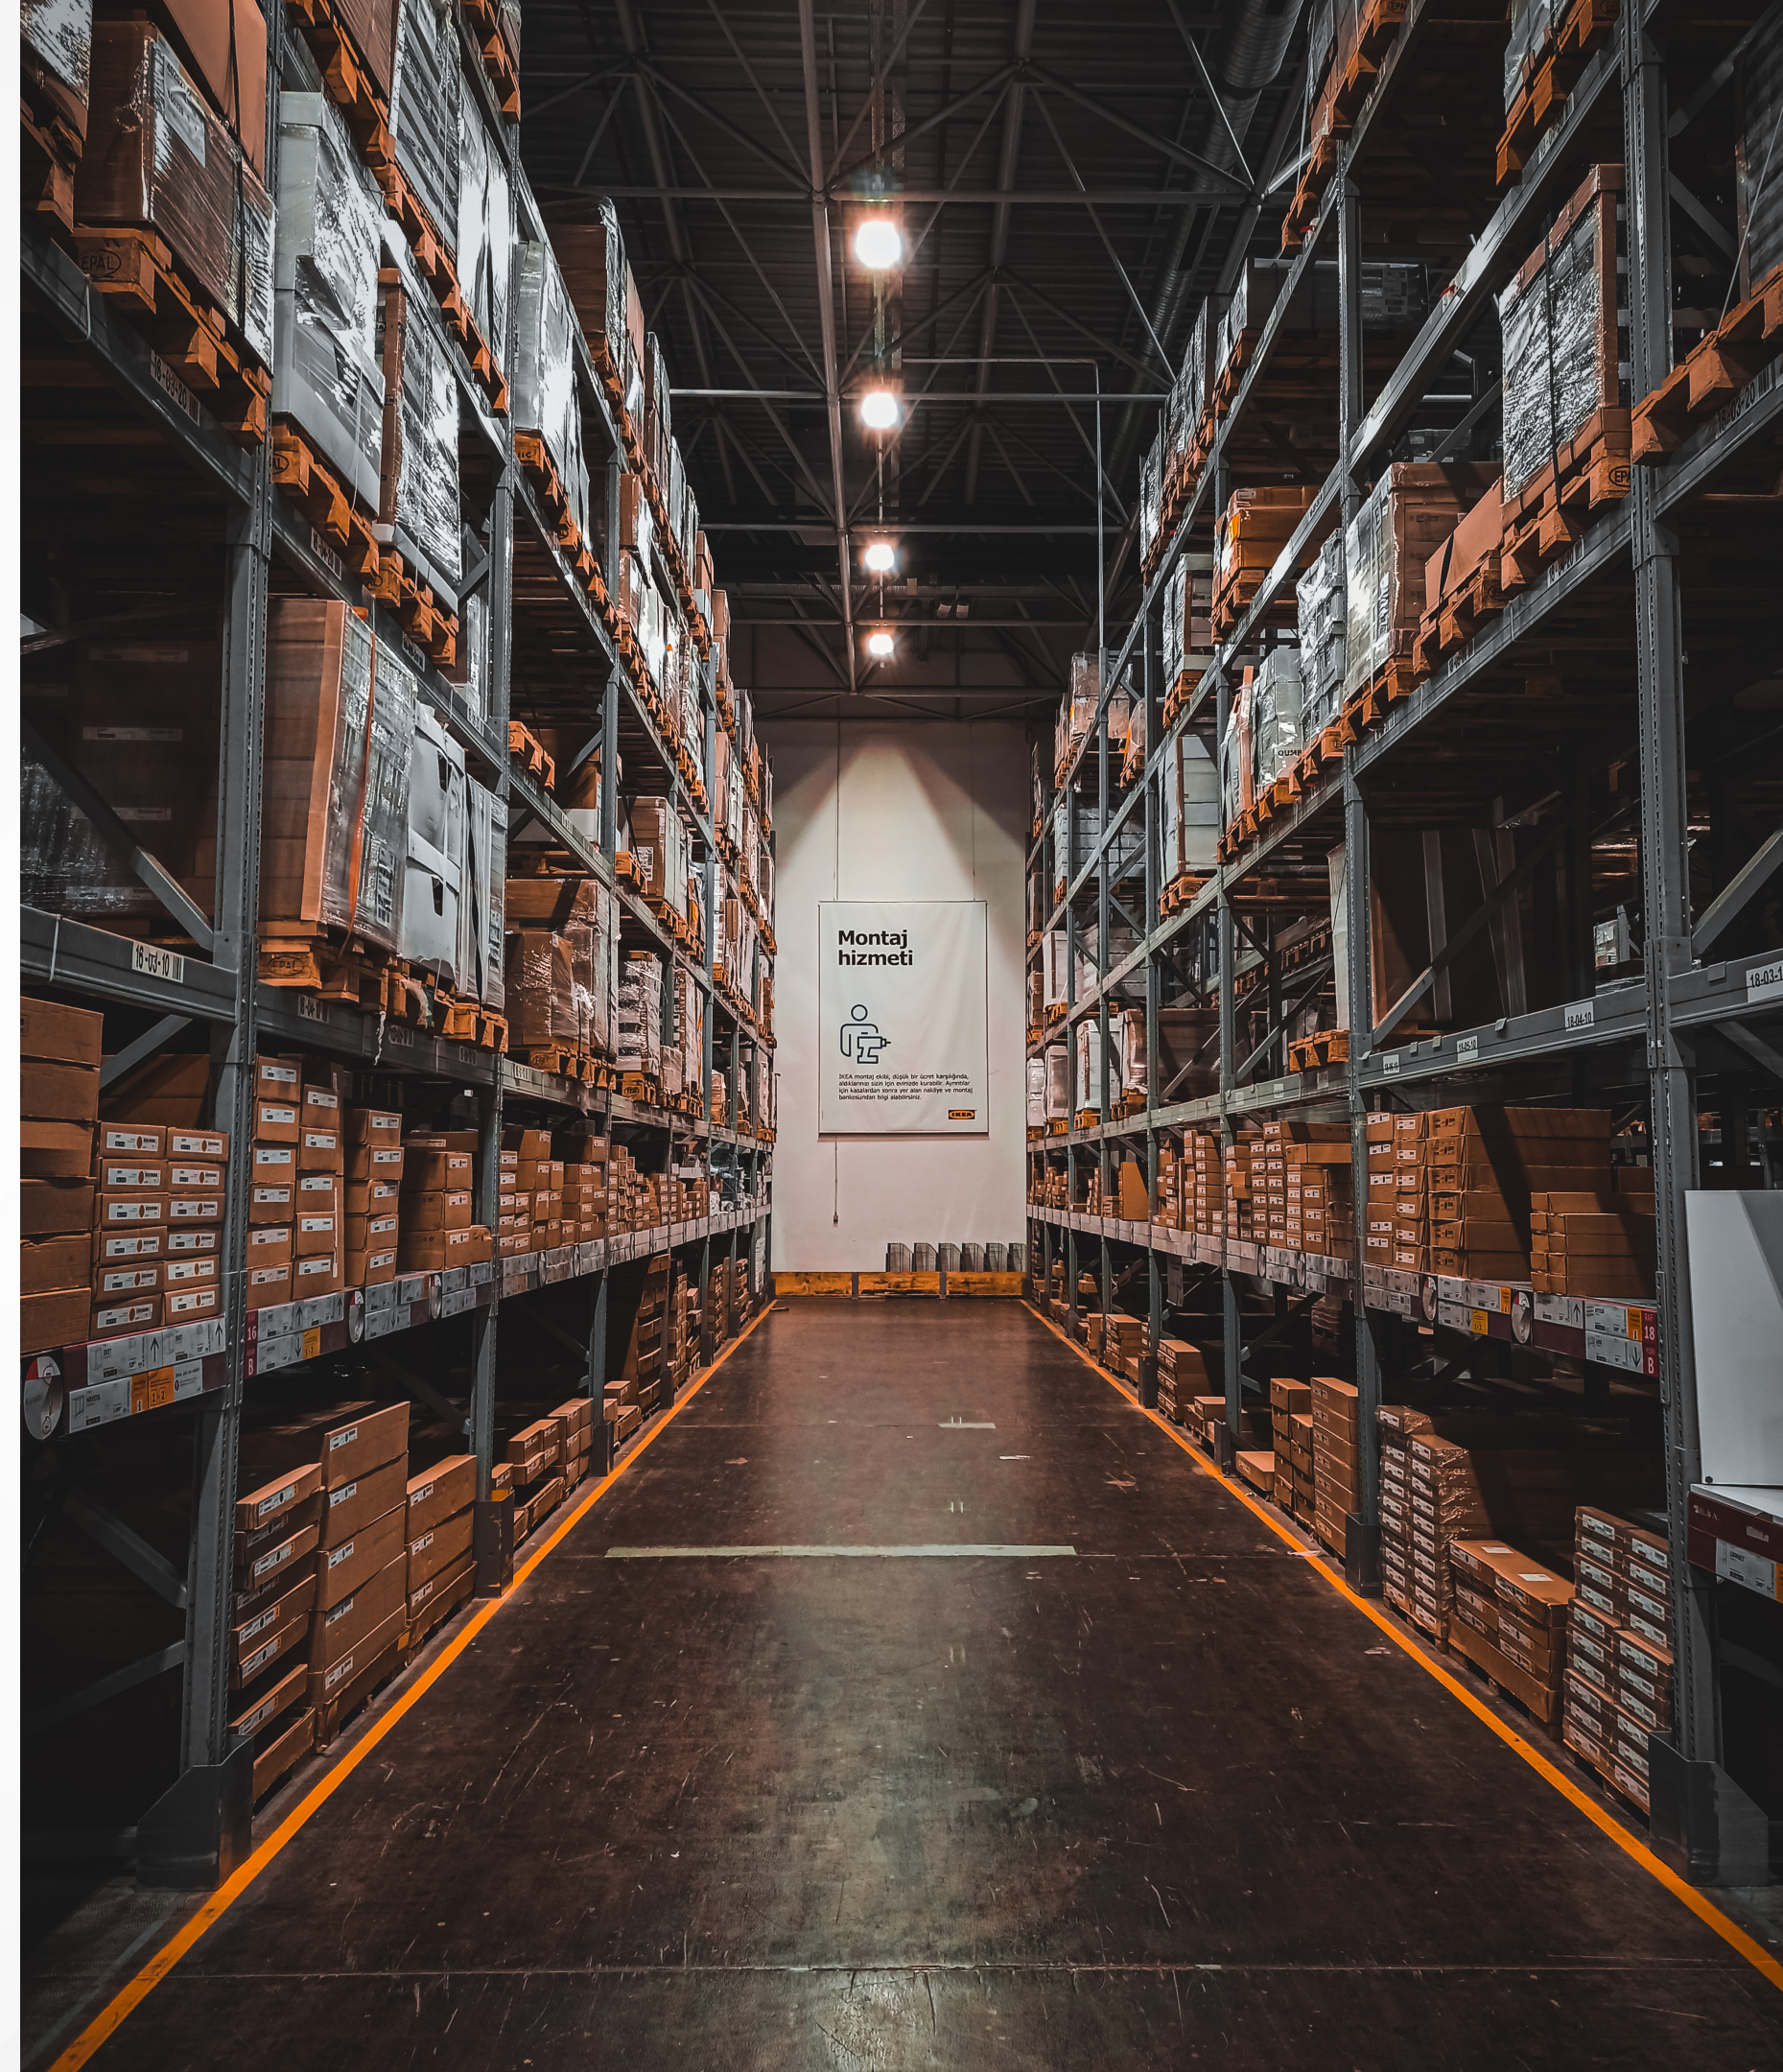

LOGISTICS AND STORAGE FOR AGRI-COMMODITIES

As you plot out your company's growth, our logistics and Warehousing services can point you in the direction of the most advantageous sites. Finding the optimal inventory levels and rack design requires strong client communication. If your company uses ERP software, you may take use of our WMS solution. By doing so, you may streamline the order processing from your OM system and automate the process of updating your MM module with stock changes.

RECOMMENDED APPROACHES TO OPERATIONAL COLLATERAL MANAGEMENT

To help FPOs and farmers optimize their agricultural value chains, Go Green Warehouses offers collateral risk management and financial facilitation services. Either negotiable (ENWR) or non-negotiable (ENNWR) Electronic Warehouse Receipts are easily issued via our strong links with WDRA and repositories like NERL and CCRL. By contacting their Repository Participants at WDRA accredited warehouses, our clients may request the formation of the same.
