The medication functions by raising the stream of blood to the male organ. This helps men to gain firm erections during sensual communication with the lady. The medication can be consumed just by chewing without the help of water. It is available in strawberry flavour.

### **Various symptoms of erectile disorder or Impotence might include:**

- Inability to attain an erection during the sensual interaction with the partner
- Inability to maintain an erection during the sensual interaction with the partner
- Low level of libido
- Not being able to ejaculate after the completion of the sensual interaction with the partner
- Stress
- Anxiety
- Feeling of shame

- Low level of sensation
- Unsatisfied during the sensual interaction with the partner

### **Diagnosis of erectile disorder or Impotence might include:**

For the diagnosis of erectile disorder, a doctor might carry out a blood test. He might enquire about your medical history as well. If you are suffering from any kind of underlying health conditions then he might signify that these health problems are the root cause behind your sensual condition. Many times further testing is also required.

### **Causes of erectile disorder or Impotence might include:**

Various factors might cause sudden and even onset of erectile disorder. The most common of them comprise:

#### **Medical factors:**

**Vascular issues:** Many times sudden erectile disorder is caused due to a condition known as atherosclerosis. This condition can cause the plaque to build up in the arteries. This might cause blockage and low flow of blood to the male organ.

**Endocrine and/or metabolic disorders:** The most common example of these types of disorders is diabetes. This condition can lower the flow of blood to the male organ. Men who are diabetic are at a greater risk of suffering from erectile disorder.

- Prostate cancer treatments
- A lot of medications can also lead to erection failure
- Neurological disorders: The most common example of these types of disorders include Multiple sclerosis, spinal cord injuries, and multiple traumatic brain injuries
- Injury to the male organ, prostate, or bladder

#### **Psychological**

- Chronic stress Anxiety.
- Low self-esteem.

- Guilt or fear
