

Upgrade Your Shooting Experience with Daniel Defense® Firearms

Upgrade Your Shooting Experience with Daniel Defense® Firearms

There are many budget-friendly options in the AR15 world, but with a lower budget comes lower quality. Daniel Defense® rifles, on the other hand, are built to be the best in the business. They are designed, engineered, and built to perform in any condition, and if you treat them well, they'll serve you well for years and years. Whether you are looking for an [M4 carbine](#) or a longer Mark 12, it's time to upgrade to a higher standard of shooting with Daniel Defense®.

The Classic: M4A1

The [M4A1](#) carbine is still a workhorse of the United States military, and the Daniel Defense® take on it is perfect for civilian shooters. It features a RIS II Picatinny quad rail, the same one that has been in use by the U.S. Special Operations Command since 2005. Built around a 14.5-inch cold hammer forged M4-profile barrel, the M4A1 ends with a Daniel Defense® Flash Suppressor. The charging handle is ambidextrous, and the rifle features a pistol grip and ergonomic Daniel Defense® Buttstock. It's durable, reliable, accurate, and designed for handling the harshest conditions.

The Long-Range Rifle: MK12

If you need even more accuracy and range than the [Block 2 M4](#) offers, it's time to get a longer barrel and go with a Mark 12. The MK12 AR15 evolved as a special-purpose rifle, built around an 18-inch stainless steel barrel with a cold hammer forged 556 chamber. Also built for SOCOM, the MK12 uses a rifle-length direct impingement system, often more accurate than their gas piston brethren. A 12-inch free-floating Picatinny handrail offers your choice of optics and accessories while preserving accuracy. Add in an ambi charging handle, Daniel Defense® Improved Flash Suppressor, and the legendary Geissele SSA 2-Stage Trigger, and you have a complete, accurate rifle package.

The Sidearm: H9

Are you looking for a sidearm to accompany your AR15? Daniel Defense® has taken the handgun to a whole new level with the H9. It combines the portability and ergonomics of the venerated 1911 with the maintenance and easy shooting of a striker-fired pistol. It offers a low bore axis for reduced recoil and muzzle flip, allowing for faster, more accurate follow-up shots. It's easy to customize thanks to the modular design, and the 1911-style straight-pullback trigger with a safety blade offers precision control and safe operation. The ambi controls are customizable and offer superb maneuverability and ergonomics.

You've spent thousands of hours training, and you deserve a firearm that can keep up with your demands. Shop the full Daniel Defense® lineup and upgrade to the best in the business.
