

TIA ENTERPRISE CO., LTD.
Reliable Water Purifier Manufacturer

Water Filters: Keeping Your Water Clean and Safe

[Water Filters](#) by Green-Tak incorporated various filtration media, including polypropylene, activated carbon, ion exchange resin, membranes, mineral stone, and ceramic alkaline balls. Each component serves a unique function in filtering out various pollutants.

Polypropylene captures larger particles whereas activated carbon removes impurities and odors out of the water. Additionally, ion exchange resin softens water, membranes help to remove tiny contaminants and mineral stones add minerals to the water. Finally, the ceramic alkaline balances the pH level of the drinking water. All these key components work symbiotically to purify water and provide us with the best drinking water.

0.5 Micron Activated Carbon Block CTO Filters for Chlorine, Lead and Cyst Reduction

CTO-PBX5

High Efficiency Activated Carbon Block Filter Cartridge 0.5u 0.5 Micron Pore Size, Lead Reduction, Cyst Reduction, Chlorine Reduction, Dirt and Particles Removal, MADE IN TAIWAN
